

After viewing Darren DeBlois' presentation:

I oppose the amendments and recommendations.

Do you have any additional comments about the black bear rule amendments or recommendations?

The bear harvest has already been on an increase the past several years, with depredation decreasing each year. Deer units on a predator management plan should have to show proof that bears are the reason or a substantial part of the reason the unit is below objective before we increase tags. Humans are the deers biggest predator and tags should be decreased for deer and keep the human predator in check for harvest. Much of the state is not having an increase in bear numbers and units such as the Bookcliffs are seeing less bears and this is from a person who has hunted the Bookcliffs for over 3 decades.

I have started to see a lot of bears and cougars on my game cameras. I would love to have fewer predators (of about all species) competing against our already struggling herds.
